

We believe in successful Ukraine!

The Declaration of the Ukrainian Business Association 2015

Today each Ukrainian businessman should make his choice – either to change the country for the better or to move to another country.

We have made our choice.

We – are those who believed after the Maidan: only transparent and responsible business can be an engine for changes in the country.

We – are those who stay and work in Ukraine to meet the needs of the Ukrainians for better life.

We – are the entrepreneurs that feel responsible for the development of our country.

We are starting a professional dialogue with the authorities on behalf of the business community to enable the economical miracle in Ukraine; to protect the interests of fair and transparent business, of every entrepreneur that provides work places and money for the Ukrainians, and for the country – stability and development.

Our key values – honor and reputation, so we rebel against corruption and lawlessness because they destroy our chances to survive as an independent country.

We refuse to compete with each other in favor of cooperation and our mutual goal – to build fair and responsible business community in Ukraine.

We gathered here to create a New Economical Paradigm of Ukraine and to make a reality of it.

Each of us feels himself a shareholder of Ukraine – so we will focus our mutual efforts on capitalization of all country's asserts – first of all, human capital.

We believe in successful Ukraine and the Ukrainians – the nation of clever and happy people, the nation of creators and masters.
